

Web design & maintenance for schools and districts

The **Humboldt County Office of Education's Communication Center** can make creating, redesigning and/or maintaining a Web site for your school or district affordable and easy.

We can design a Web site that allows a designated person at your school or district to update information; or, if you prefer, the Communication Center can update and maintain your site quickly by email or phone.

You can highlight upcoming events, bring quick attention to any changes in schedules, post recent photos, and provide on-line interactive communication.

Some of the features we can add or create for your Web site include:

- Graphics and photos
- Rollover buttons/animations
- Your School Accountability Report Card
- Email links
- Links to Web resources for curriculum
- A discussion board

You can make your Web site a favorite with parents and students by providing interesting, useful, and up-to-date information. Put your best foot forward in the community with a well-designed, easy-to-navigate site that showcases your school's achievements.

some things to consider for your Web site:

- Your school logo and/or mascot
- Photos of your school
- Staff Directory
- Mission Statement
- School Accountability Report Card
- Board and site council meetings
- School rules and policies
- Child care/after school programs
- Lunch menus
- Bus schedules
- School calendar
- Upcoming school events
- Field trip information
- Coverage of special projects
- Extracurricular clubs and activities
- Homework help
- New programs/equipment

Creating and maintaining an interesting and informative Web site is probably more affordable than you realize. It's easy to get started. Just give us a call at 445-7024.

samples of our work

In addition to designing the Humboldt County
Office of Education's Web site,
